

Press Release

Circet Switzerland Acquires Technik Partner to Strengthen its Leadership in Swiss Telecom Infrastructure and Expand into New Growth Markets

Zurich, Switzerland - July 29, 2026 - Circet Switzerland, a leading provider of telecom and energy infrastructure services across Switzerland, today announces the acquisition of Technik Partner AG ("TP"), Switzerland's leading specialist in FTTH in-building connectivity (Network Level 4 / NE4*) services.

Founded in 2009 and headquartered in Zurich, Technik Partner has established itself as the No.1 player in Switzerland's NE4 fiber connectivity segment, connecting more residential units than any other provider in the country. The company supports a nationwide customer base and has developed a long-standing strategic relationship with Swisscom, Switzerland's leading telecommunications operator, for whom it has become the leading partner for customer-driven FTTH connections. Today, more than 120 professionals support Technik Partner's operations across Switzerland through a combination of direct employees and dedicated subcontractor teams.

The acquisition strengthens Circet Switzerland's telecom offering by adding the country's foremost specialist in FTTH in-building connectivity. Beyond reinforcing Circet's position in the Swiss telecom market and its relationship with Swisscom, Technik Partner also provides a platform to expand into adjacent infrastructure segments, including smart infrastructure, utility digitalization and transport communication networks.

Mevludin Hodza, Founder and CEO of Technik Partner, commented: *"Joining Circet marks an exciting new chapter for Technik Partner. Over the last fifteen years, we have built a leading position in our market through technical expertise, operational excellence, and a relentless focus on customer satisfaction. As part of the Circet Group, we will benefit from the scale, financial strength and international expertise of a leading infrastructure services platform, allowing us to accelerate our growth, pursue new opportunities and continue delivering the high-quality service our customers expect. We look forward to building the future together."*

Denis Gheysen, Chairman of the Circet Group companies in Switzerland, commented: *"The acquisition of Technik Partner (TP) represents an important milestone in our ambition to further strengthen Circet's position in the Swiss telecom infrastructure market. TP has built an outstanding reputation as the country's leading specialist in in-building fiber connectivity and has developed a unique relationship with Swisscom and other key customers. Together, we will be able to offer an even broader range of services, while leveraging TP's expertise to expand into attractive adjacent markets such as smart metering and rail telecommunications. We are delighted to welcome Mevludin Hodza and the entire Technik Partner team to Circet."*

The transaction also ensures strong continuity for customers, employees and partners. Technik Partner's management team will continue to lead the business and support its next phase of growth, while benefiting from the resources, capabilities and long-term investment approach of the Circet Group.

**Network Level 4 (NE4) refers to the in-building segment of the fiber network - the cabling inside a building, from the building entry point to the connection socket in each residential or commercial unit.*

ABOUT TECHNIK PARTNER

Technik Partner AG is Switzerland's leading specialist in FTTH in-building connectivity (NE4) services. Founded in 2009 and headquartered in Zurich, the company provides fiber installation, commissioning and customer connection services for telecommunications operators, utilities and infrastructure owners. TP is recognized for its strong execution capabilities, highly qualified workforce, digitalized processes and long-standing customer relationships. The company has been a key partner to Swisscom for more than a decade and has recently expanded into complementary activities including smart metering solutions.
